To whom it may concern:

I am writing this reference at the request of Joe Fullone, President of Fullone Structural Group, pursuant to their RFQ submittal to the City of Clermont.

I have worked with Fullone Structural Group on multiple projects, spanning over the last 8 years. In that time period we have not encountered schedule delays based on work produced by Fullone Structural as one of our consultants. Nor have we have encountered issues in construction or change orders based on errors or omissions in Fullone Group's structural designs.

The last project that I worked with Fullone Structural on was a multiphase renovation project for the Hilton Hotel located in Downtown Tampa Florida that was completed in 2018. Fullone Group designed structural modifications for a new rooftop pool amenity deck and designed structural repairs to the existing pool substructure. My current firm has multiple large, mixed-use residential projects where we are working with Fullone group as the structural engineer.

Prior to my employment at BDG architects, I worked with Fullone Group while employed as a project architect at RRW architects. During that time, I worked with Fullone group on the Souzou Asian Fusion restaurant project, where they were the engineer of record for the shell building, and on the Acura of Naples car dealership expansion.

I would highly recommend Fullone Structural Group, based on their performance in the projects I have worked directly with them on, and based on their performance I have witnessed for projects in other studios in my firm where they are engaged as a consultant.

If you need any additional information, feel free to contact me at the telephone number listed above, or by email at greg.walden@bdgllp.com.

Sincerely,

Greg Walden
