

To Whom It May Concern:

It is my pleasure to strongly recommend Joseph Fullone, and the entire Fullone Structural Group, Inc., for the City of Clermont Fire Station #2 project.

I am Gregg Holdsworth, Senior Vice President of Architecture for BDG Architects. I have over 20 years of experience working as an architect in Florida with BDG. Having worked with many professional consultants during this time, Fullone Structural Group, Inc. has been extremely reliable and competent as a working partner.

My professional history with Joe precedes the formation of FSG, when he was a Project Engineer for a previous firm. His knowledge, professionalism and Ingenuity in providing solutions in that position was a major reason we supported and continued to utilize Joe in the formation of FSG. That relationship continues today as we both grow and excel in our fields of specialty.

Our most recent venture has been The Boulevard at West River, a multi-phase project consisting of mid-rise multi-family residences, including accessory retail and assembly spaces and parking structures. The project is part of a larger City of Tampa initiative revitalizing the area adjacent to the Hillsborough River. Our team has successfully navigated the numerous requirements imposed on the parcels, from HUD involvement to designing around old growth Live Oaks and antiquated infrastructure to provide an economical and aesthetically pleasing solution for the Owner. This was only achieved through a team that worked seamlessly together, and Fullone Structural Group, Inc has been a vital part of the project's success.

I am confident that Joseph Fullone's leadership of FSG will be an asset on any team providing structural services for the City's new Fire Station.

If you are in need of additional information, do not hesitate in contacting me at (727) 631-6017, or via email at Gregg.Holdsworth@bdgllp.com.

Sincerely,
